

Truck parking curb recommendations from Curbo.

If you would like an in person demonstration please call or text us at 443-672-8726.

We have over 50,000 Aztecs in service at warehouses all across America.
There are pros and cons to both models.

#AZTEC

The Warehouse Curbo Fedex, Lidl & Amazon spec

NOTES: 5500 PSI Air Entrained Concrete 1,174 lbs

AZ Truck Curb

Curbo AZTEC truck curb pros:

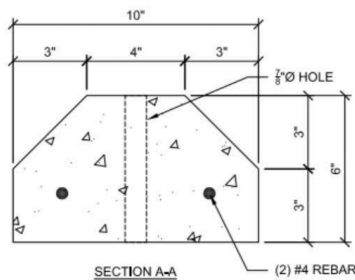

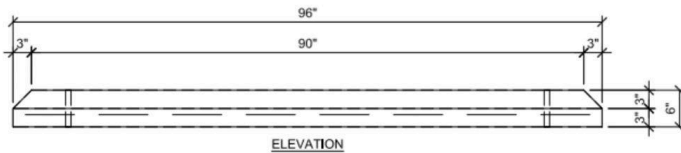

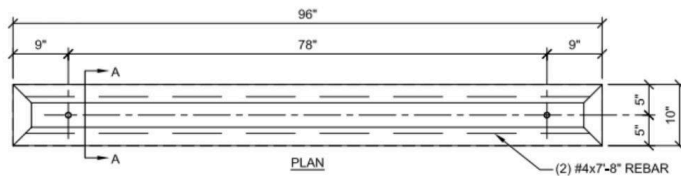

- Foolproof stop for heavy use and safety conscious warehouses
- Designed heavy duty to last at least 10 years under normal conditions
- Our most popular option by far for conventional heavy duty truck parking
- Trailers backing over the wheel stop is almost impossible
- Highly recommended to protect critical infrastructure
- 10 year warranty

Curbo AZTEC cons:

- Special training required for jockey truck drivers
- Back trailer bumpers can get ripped off if jockey trucks "jack it up" too much
- High maintenance costs can be expected in yards that depend on jockey trucks
- Higher maintenance/replacements cost per curb
- Initial cost including freight is almost double compared to our standard #NAZTEC truck curb

#NAZTEC

Basic truck Curbo

NOTES: 5500 PSI Air Entrained Concrete 400 lbs

Curbo NAZTEC (New Aztec) Truck Curb pros:

- Jockey truck driver friendly
- Easier installation and maintenance
- 1/2 the initial installation cost compared to our Aztec model
- Our most popular model for flat surface parking and jockey truck yards
- 1/2 the material and shipping cost compared to the Curbo AZTEC truck stop
- Will keep a trailer from rolling in the parked position
- 5 year warranty

Curbo NAZTEC (New Aztec) Truck Curb cons:

- Not recommended in front of critical infrastructure & light poles
- Trailer can easily be pushed over the wheel stop
- Trucks can jump the Naztec curb (Fortunately the 6.5" height eliminates damage to truck/trailer gears & frame)
- Less of a visual barrier, painting with safety yellow after installation is highly recommended

We can provide in person demonstrations for warehouses at no charge.
