CURBO

Concrete Solutions For Better Parking

Started in 1985, CURBO Parking Curbs is a family owned business located near Lancaster PA

A unique combination of traditional and modern lifestyles is common in the area surrounding the company, where horse and buggy rigs mingle with trucks and cars on the road.

This is a fitting location for the work of CURBO Concrete Solutions, where, in a 30,000 square foot shop, thousands of parking curbs are produced every month by a talented team, using modern tools and up-to-date, highly-durable finishing techniques.

CURBO Parking Curbs serves the entire USA with top quality concrete parking curbs built to last for the ages.

Freedom Tower, NYC & Jersey City

Concrete Advantages:

- ◆ Concrete Parking Curb Pricing is usually about 1/2 of a similar product in rubber or plastic.
- ◆ No harmful, cancer causing carcinogens emitted in the manufacturing process.
- ◆ Manufactured with the most plentiful resources & raw materials on planet Earth.
- ◆ Our 5500 psi wet cast concrete mix with air entrainers & superplasticizers has been proven to outlast rubber & plastic products in longevity & weathering resistance.

Design tips

- ◆ 3 feet is the ideal edge to edge measurement from the edge of the parking lot
- ◆ 6-7 feet is usually required at walkways and double parallel parking
- ◆ Truck curb to edge of parking lot spacing is 6 feet if there are no obstructions in the back
- ◆ 18 foot is usually required at walkways and double parallel parking
- ◆ 12 foot is usually required from light pole bases and other similar obstructions
- ◆ Check with your local codes as these vary widely from state to state
